

OMER 83P Series Staplers

The 83P series staplers are extremely fast, light-weight, well-balanced and designed for high volume industrial use. They drive RAPTOR® 11mm crown, 11mm leg length, 16 gauge composite staples.

The 83P series is offered in two magazine lengths and safety options; a standard-length magazine or a long magazine for operators who prefer less reloading and a trigger safety or a contact trip safety option to reduce the possibility of accidental firing.

The 83P.215 is a more powerful stapler created for applications requiring longer staples. It is a robust tool designed for industrial use, with ample power to drive both the 11mm and the longer 14mm length staples into medium to high density materials.

Additional options for automation:
 Remote triggers
 Mounting brackets
 Auto-fire mechanisms
